TO WHOM IT MAY CONCERN

My wife Smt. Poonam Mishra is under treatment of Dr. (Prof.) Uma Kumar, Head of the Department of Rheumatology in AIIMS, New Delhi, for Hypothyroid Arthropathy, resulting in Episcleritis. She had been suffering from this disease for a long period and when Episcleritis developed in her eyes, she was referred by the Eye Specialist to Dr. (Prof.) Uma Kumar in AIIMS, for treatment.

My wife has been under the treatment of Dr. (Prof.) Uma Kumar for the last about two years and her condition has improved a lot. The personal care taken by Dr. (Prof.) Uma Kumar is really very appreciable. For consultation, I have also visited along with my wife in her O.P.D., where I found that she was very patiently giving time to all the patients and hearing their problems, personally answering all their queries, which was really very appreciable for a busy doctor like her. I have also had the opportunity to hear Dr. (Prof.) Uma Kumar on T.V. in various health related programmes and I am personally very impressed with the lucid manner, in which, she used to elaborate problems to the public relating to Rheumatology.

I am personally very thankful to Dr. (Prof.) Uma Kumar for the manner, in which, she has been giving treatment to my wife and I appreciate the personal care she takes of all the patients under her treatment.

I wish her all success in life.
