ALL INDIA INSTITUTE OF MEDICAL SCIENCES ANSARI NAGAR, NEW DELHI-29 STORE SECTION (CNC)

Tender No.63/CNC/CTVS/24-25/ST.

TENDER CORRIGENDUM

Dated: 18/10/2024

The Tender No.63/CNC/CTVS/24-25/ST. with tender ID:2024_AIMSD_827500_1 was published in CPP Portal (e-Procurement) on date:24/09/2024 for the purchase of **Cell Saver for Intra-operative** Blood Salvage (Cell Saver)-03 Nos. for the department of CTVS, CNC, AIIMS, NEW DELHI. In response to the published bid, two bidders (i.e. M/s. Genesee Medical and M/s. J Mitra& Sons) submitted their representations and requested for amendment in the published specifications. Upon the request of the potential vendors & recommendations of TSEC, few amendments have been carried out in the published specifications. The bid submission end date and Opening date are also being extended as under:

Description	Existing	Amended as
Bid submission end Date and Time	23/10/2024 03:00 PM	29/10/2024 03:00 PM
Bid Opening Date and Time	24/10/2024 03:00 PM	30/10/2024 03:00 PM

Sr. No.	Item's Name: Cell Saver for Intra-Operative Blood Salvage (Cell Saver)
1.	System should be capable of processing blood collected from a surgical site to produce washed red blood cell to return to patient later on.
2.	System should work on centrifuge principle and should operate on 1000-2500 rpm with variable speed wash.
3.	System should have a smaller foot print with big lockable castor wheel and weight should be less than 90Kg (inclusive of accessories and cart) for ease of mobility.
4.	System should be fully automated with <u>simple operation and absolutely</u> minimal user intervention.
5.	The system has an in-built and regulated vacuum suction.
6.	Centrifugal bowl capacity should be 125-230 ml with two stage filling cycle or equivalent technology.
7.	The system has variable speed pulse wash cycle.
8.	System should be approved by <u>US FDA/CE</u> for autologous blood transfusion.
9.	Three Suction options, on board.
	a. SMART SUCTION TECHNOLOGY (volume based)
	b. Regulated on board suction,
	c. Post-op suction.
10.	Should be able to continue the procedure and maintain data even in case of power failure.
11.	A built in barçode reader to record disposable set, solutions and operator/patients information.
12.	The ability to download data using a USB flash drive.
13.	A color touch screen display.
14.	The noise level of the device should be < 70 db.
15.	Device should have effluent line sensor, reservoir level sensor and automatic bowl identification program.
16.	RBC recovery should be more than 90%.
17.	The device should have post-operative mode to work even after surgery by collecting the blood from the disposable tubing placed in the wound.
18.	Completely automated postoperative operation.
19.	The device generates the suction in the reservoir.

collects in the reservoir. System specification: i. Electrical Specification: Class I, type B, Ordinary, Continuous operation ii. Power- a. Should be able continue the procedure and able to maintain defailure. b. Voltage: 110/120 or 220/240 V. c. Cycles: 50-60 Hz. d. Phase- Single e. Current- 11.6/0.8 amps (depending upon voltage selection) f. Fuses- 4AT/240V g. Power cord: 2 wire ground (earth) connecting grade. iii. Speed and flow rate specifications- a. Centrifuge- 0-1500 RPM. b. Washing Chamber- 0-2400 RPM c. Pump 20-1000 ml/minute (+/-5%) iv. Vacuum- 200-280 mbar v. Temperature Limit a. Operational: 15-50 degree Celcius b. Storage: -15 to 60 degree Celcius vi. Humidity Range a. Operational 24-80% non-condensing. b. Storage 10-95% non condensing. 22. Should be supplied with 10 sets of consumable accessories in addidisposable accessories by supplier along with the one pack of machine. 23. Offered, all inclusive accessories in one pack of machine should be specifed. List with cost of all spares, accessories, consumables items (required should be quoted separately in the Financial Bid section (PDF) and the valid till the warranty & CAMC period from the date of Installation of equal till the warranty & CAMC period from the date of Installation of equal till the content of the series and the spares/accessories/consumables, required to run the equipment, during the period, as and when required basis. If the equipment is software based and new software is introduced withing the period, as and when required basis. If the equipment is software based and new software is introduced withing the period, as and when required basis. If the equipment is software based and new software is introduced withing the period, as and when required basis. If the equipment is software based and new software is introduced withing the period, as and when required basis. If the equipment is software based and new software is introduced withing the period, as and when required basis. If the equipment is software based	unt of blood solution
i. Electrical Specification: Class I, type B, Ordinary, Continuous operatio ii. Power- a. Should be able continue the procedure and able to maintain de failure. b. Voltage: 110/120 or 220/240 V. c. Cycles: 50-60 Hz. d. Phase- Single e. Current- 11.6/0.8 amps (depending upon voltage selection) f. Fuses- 4AT/240V g. Power cord: 2 wire ground (earth) connecting grade. iii. Speed and flow rate specifications- a. Centrifuge- 0-1500 RPM. b. Washing Chamber- 0-2400 RPM c. Pump 20-1000 ml/minute (+/-5%) iv. Vacuum- 200-280 mbar v. Temperature Limit a. Operational: 15-50 degree Celcius b. Storage: -15 to 60 degree Celcius vi. Humidity Range a. Operational 24-80% non-condensing. b. Storage 10-95% non condensing. 22. Should be supplied with 10 sets of consumable accessories in addidisposable accessories by supplier along with the one pack of machine. 23. Offered, all inclusive accessories in one pack of machine should be specificated till the warranty & CAMC period from the date of Installation of equal till the warranty & CAMC period from the date of Installation of equal till the warranty & CAMC period from the date of Installation of equal till the warranty & CAMC period from the date of Installation of equal till the warranty of the degree of the period, as and when required basis. The parent company should certify that the quoted product is not going to line for at least 10 years from date of quotation. The parent company should egive an undertaking the spares/accessories/consumables, required to run the equipment, during the period, as and when required basis. If the equipment is software based and new software is introduced withing updates will be provided by the OEM/Supplier at free of cost. The department may ask for demonstration of actual quoted product or ever a force of the equipment of the period, as and when required to run the equipment, during the period, as and when required basis. If the equipment is software based and new software is introduced withing the period of the period of the period	
ii. Power- a. Should be able continue the procedure and able to maintain de failure. b. Voltage: 110/120 or 220/240 V. c. Cycles: 50-60 Hz. d. Phase- Single e.
