The firms have to quote for one best quality only and only sample of the quality should be submitted. The offers submitted as quality A, B, C, & D etc. will be summarily rejected, any alteration in the specification shall not be considered at all.

The quoted items having quality mark such as I.S.I/C.E. mark/ISO9002 Standardization should be mentioned if any.

<u>S.No.</u>	<u>NOMENCLATURE: -</u>	<u>Qty.</u>
1.	16 Channel ECG Machine	01 Nos

Specifications

Sl.No:	Specification of the equipment
1.	State of the art 16 channel digital ECG machine with simultaneous and sequential acquisition of all leads and an LCD display of the trace prior to printing. It should be possible to transmit full ECG's for printing wirelessly.
2.	Should have real time display of ECG wave forms with signal quality indication for each lead. Should have adjustable artifact, AC and low and high pass frequency filters. Should have an adequate size onscreen/physical QWERTY keyboard for easy entry of patient data.
3.	Printing should be possible on inbuilt thermal printer and also on an A4 sized laser paper of standard makes. Thermal printer

	prints should last over 5 years when kept in normal conditions.
4.	The unit should be lightweight and portable, capable of storing at least 100 electrocardiograms and allow for rapid transfer of this data to a computer through wireless or USB ports. DICOMHL7 ready for data transfer to a HIS/PACS. Should be possible to collate ECGs based on data like ECGs with QRSd>120 ms or QTc>450ms
5.	Machine should run both on AC current & built in rechargeable batteries and should be provided with a proper bag to carry the equipment and its ancillaries. A movable original CART to which the machine can be fixed has to be supplied in addition.
6.	The ECG machine should conform to AHA/ACC guidelines and ANSI/AAMI standards for medical equipment
7.	The unit should have the capability for proper self check & calibration
8.	Two sets of adult, pediatric clip type electrodes for limb leads along with necessary cables should be provided.
9.	The output should have the name, date, time, ID no. of ECG printed and have the option to print in multiple formats. Should provide all intervals like, PR, QRS, QT, heart rate, RR etc
10.	It should have an easily adjustable filter setting, paper speed from 12.5 to 50 mm/sec, adjust voltages to 1/4 th or double the standard size.
11.	The unit should be capable of providing continuous single, three, six and 12 channel outputs in any combination in case of necessity of long rhythm strips.

12.	<p>In case the machine needs a computer to provide the laser outputs, then computer of a standard make with good RAM/HDD and a high speed B & W laser printer and necessary software should also be provided. These have to be under similar warranty. The computer should be having the latest generation Intel</p> <p>processor with at least 8GB RAM and a 500 GB HDD (preferably solid state or a combination). Laser printer should be able to print at least 12ppm of A4/Letter size and have wireless connectivity with the PC or the ECG machine. Only standard makes of Laser printers whose cartridges are easily available should be provided.</p>
13.	<p>Should be HL 7 compliant with facility of storage of EGMs in raw/DICOM format for future automated analysis on commercially available systems like MUSE etc. System has to be integrated to existing HIS / PACS of AIIMS.</p>
14.	<p>All spares should be quoted separately i.e. ECG clips, bulbs, ECG cables and batteries. Each machine should have a spare cable, leads, bulbs etc.</p>
15.	<p>Comprehensive Guarantee for Five years for parts and labour. Comprehensive Guarantee for parts and labour from year 6 to 10 will also need to be quoted in the price separately and will be taken into account (added in the price bid) while calculating the Final Price. All cables, electrodes, bulbs Battery etc have to be provided by the vender during the warranty period. Normal wear and tear of battery/cables etc should be factored in the basic price.</p>
16.	<p>It should be USFDA approved</p>
