**STORES OFFICER (RS)**

**Encl: Related documents enclosed.**

- 1. PAC Certificate enclosed.**
- 2. Performa Invoice**

**Specifications for a research performance assessment and benchmarking online tool to provide the latest research trends with a multifaceted analytics view powered by Web of Science data.**

The online tool should have the following features:

1. Calculate research performance of the organization using advanced bibliometric research performance indicators (such as research category normalized citation impact, average percentile, % of publications in top 1%, % of publications in 10%, % of international collaborations) with the underlying data from Web of Science
2. Benchmark and compare performance with peers using a variety of metrics leveraging the data from Web of Science
3. Promote areas of specialization and strength to demonstrate the impact of its research to the various funders as well as to its institution's various departments using normalized Bibliometric indicators
4. Analyse global funding landscape for at least last 10 years using funding acknowledgement in the publications to identify emerging subject areas, researchers, organisations and countries
5. Analyze existing collaborative partnerships using bibliometric data and find new ones to improve our research impact
6. Identify the journals with Journal Impact Factor©inwhich institutional researchers have published
7. Fully integrate with Web of Science to support building and sending custom datasets of at least up-to 50,000 publications records from Web of Science to InCites for further bibliometric analysis
8. Enable highly cited papers and hot papers separate filter in web of science to support literature search for the researchers
9. Provides percentage and number of publications in a publication set in quartile 1 journals, quartile 2 journals, quartile 3 journals, quartile 4 journals by journal impact factor.
10. Provide access to global baseline (global average citations for a given research area for the given year) and different citation thresholds (top 1%, top 5%, top 10%, Top 25%, top 50% etc.) for at least last 10 years using Web of science data
11. Helps institution to validate underlying data for analytics using existing citation database subscribed
12. Provide capability to save queries on dashboard for each user within the institution
13. Provide different visualization options such as bar graph, trend graph, tree map, radar chart, 5 year trend chart, bubble graph, geographic graph etc.
14. Ability to download data upto 50,000 records in a single download
15. Rank top countries, journals, scientists, papers, and institutions by field of research
16. Ability to run analytics using bibliometric data from 1980 onwards
